

I and my family are current K-LOVE listeners in the Denver area. My understanding of this issue is that with a change in the LPFM and FM translator service structure, that my current K-LOVE signal and service may be disrupted and possibly terminated. I do not want this to happen.

Not only does my family enjoy listening to this station, but it also provides a local sense of community within our church and all the people that they come in contact with. It also provides a local sense of structure and "community" for my 9 yr old daughter and my 7 yr old son at their school. Many of their friends listen to K-LOVE as well and it gives them a common bond.

If K-LOVE were to go off the air and be replaced by something else, we would most likely not be listening to the radio much at all.

Further, I believe that K-LOVE provides a place on the radio dial that gives teens a positive place to turn to for music listening. Positive influence is the key here. All local schools in all grade levels can benefit from the positive message from K-LOVE as opposed to the sometimes "negative" message (music, DJ's, etc.) from other stations. Having alternatives and choices is good. It is good for the individual and for the local community.

Please work with this issue to keep stations like K-LOVE from not disappearing from my local community.

Thank you.
